Re. Acknowledgement of Support Extended by The Health Foundation

Dear Dr. Laila

I would like to thank The Health Foundation (THF) to extend support and guidance for administering Hepatitis B Vaccine to school children, persons with disability and women survivors of violence in the rural areas of District Jhelum.

With the help of THF, we received Hepatitis B Vaccine and basic guidance about the type of doses for various age groups, maintaining cold chain and number of required doses for developing immunity against Hepatitis B.

The activity helped in reducing the vulnerability of the most marginalized community members in an effective manner.

The activity also helped in strengthening our cooperation with the department of health who allowed their vaccinators to participate in the joint venture.

I look forward to our continued cooperation with The Health Foundation in other geographical areas as well.

Regards

Lubna Hashmat
Chief Executive Officer
