Patients currently
undergoing treatment

1,292

New patients linked
to treatment

Dear Reader,

Months after unprecedented floods ravaged Pakistan, nearly 10 million people still remain in need of lifesaving support. THF continues to provide timely vaccinations, the best screening facilities, and treatment of Hepatitis, with the same devotion.

It brings us great pleasure to share this newsletter with the THF's friends, partners and well-wishers. Without your generous contributions, we would not be able to accomplish our numerous goals.

Regards,
THF Marketing Team

THF Corporate Screening Drive---Glances

October-December 2022

The Health Foundation & Murshid General Hospital signed a MoU.

The aim is to increase screening numbers, so that we can provide treatment to as many individuals as we can.

Surviving Hepatitis: A Story

The family's eldest son, Bhutto, works as a laborer in a general store in the Khandyari district of Sindh, Pakistan. After being screened in the THF camp, the unfortunate soul was found to have hepatitis B. He is the only provider for his poor family and was unable to afford the cost of hepatitis treatment.

He was assisted in his hepatitis fight by the Health Charity. He feels fortunate to have survived, but many others who are afflicted with this fatal illness are waiting for your help. In terms of the global hepatitis epidemic's spread, Pakistan comes in front. It is predicted that there will be roughly 400,000 new cases per year, meaning that one in ten people could test positive for hepatitis B and C.

Your Motivation Corner

**NO ONE HAS EVER
BECOME POOR BY GIVING**

-Anne Frank

The plight of Hepatitis in Pakistan is worsening and the battle against Hepatitis is far from over. To remain steadfast in our mission we require more support from donors which will further strengthen our resolve to eliminate the menace of Hepatitis from Pakistan.
