JULY 2026

JULY OUTREACH FOR HEPATITIS C ELIMINATION

Throughout July 2026, The Health Foundation (THF) continued its efforts toward the elimination of Hepatitis C by organizing a series of awareness and screening camps across different locations.

Through these activities, THF brought essential hepatitis services closer to communities, workplaces, hospitals, and public spaces. The camps focused on raising awareness about Hepatitis B and C, encouraging early screening, identifying positive cases, and guiding individuals toward confirmatory testing and treatment.

These activities reflect THF's ongoing commitment to reducing the burden of Hepatitis C in Pakistan by taking awareness, screening, confirmatory testing, and treatment services directly to the people. Since its establishment in 2007, THF has remained dedicated to its mission of creating a Hepatitis-Free Pakistan and transforming lives through prevention, early detection, and access to care.
